

September 26, 2022

Dear Sir / Madam,

We are delighted to write a letter of recommendation on behalf of Can Bora Ciner.

Bora was invited to our “Leadership Academy” in the summer of 2022, which is a CIT (Counsellor in Training) program aiming to prepare young people to become camp counsellors for children of age 7 to 16. Bora was invited to this highly competitive program depending on his strong character he presented as a former camper in our programs, as well as his promising potential as a young leader. Throughout the 3 week training of the Future Stars Leadership Academy, Bora attended crucial theoretical courses such as risk management, problem solving, program design, child development and leading young campers into success as well as participating in several teambuilding workshops. (Please see Future Stars Leadership Academy official transcript.)

In the practice step of the program, Bora worked as a CIT with a group of Summer camp campers of age 13 to 15. His practice with this group of campers involved acting as an assistant group leader and an assistant cabin leader, giving him the opportunity of working both on campers’ skills development during activity times and focusing on behaviour during cabin times with his campers. The relationship he built with this challenging age group was attention-grabbing. Bora completed the program and earned himself a very well-deserved spot in Future Stars team as a camp counsellor for the coming years.

Bora experienced working in a very demanding and dynamic organization with a strong emphasis on teamwork and leadership. He has been an excellent performer and a role model for children in his experience as a camp counsellor, proving his immense potential as a young person. With his committed, self-disciplined, hard-working and dynamic character, not only us, but also our fellow friends and managers at Future Stars believe that he will carry out an impressive performance in his future studies and career.

Rifat Can Barutcugil
Director, Leadership Academy
Future Stars
